Tomi Jumppanen
Profile

I am a final year software engineering student. Programming has been my passion since I was young, and I started practicing it at the age of 12 when I found my father's old Commodore 64. I have gained experience mainly through education and hobbies, but also through work. I am looking for a job that offers an opportunity to learn new things and further develop my programming and teamwork skills.

Education

Degree in Information and Communication Technology, Metropolia University of Applied Sciences
Aug 2021 - present

I have specialized in mobile development during my studies. I have gained experience with React Native, Kotlin, and a bit of Swift as well. In addition, I have received training on different software structures, project work as a group (Scrum) and various tools that programmers can use in their work.

Bachelor's degree in information and communication technology, Business College Helsinki
Aug 2018 – Dec 2020

During my studies, I initially specialized in game programming, and through this I have acquired knowledge of Unity C#. However, as my studies progressed, my interest shifted towards web applications, and I decided to gain more experience in this direction.

Work experience

React programmer, Meltex Oy (Internship)
May – November 2023

During my employment, I participated in several projects, two of which stood out. I developed an Android application with Kotlin that made it possible to enter factory's raw materials into the system using image recognition that was based on the Google ML Kit library. In addition, I implemented a tool with React and TypeScript that made the work of Meltex's salespeople easier by calculating the necessary pipes from the structural picture of the plot and designing the wells automatically.

WordPress developer, trade name
March 2021 – October 2022

I planned and implemented three projects during my company's existence, while taking care of their maintenance. I have good experience with the WooCommerce eCommerce plugin as well as its add-ons. In addition, I have knowledge of several other commonly used WordPress plugins.

Contact support person, Business College Helsinki (internship)
Jan 2019 – Apr 2019

I work as a customer service representative, providing support to Finnish and English-speaking customers. In addition, I was responsible for the implementation of a new system that improved the organization's disk image management.

Warehouse worker, Meltex Oy

For three summers, I have gained experience in warehouse work in that company. I have been given responsibilities, such as managing my duties as a supervisor and being responsible for loading and unloading trucks.

Military service

Signaller
Jan 2022 – June 2022

I did my military service as a signalman in the Karelian Brigade. During my training, I learned how to configure networks and work better as a team, and I have been able to utilize these skills also outside the military. I was also given responsibilities in the army, for example as a squad leader in the final war. This strengthened my ability to organize my team efficiently even under pressure.
